

CybTouch 6 For Press Brakes

The Intuitive Programming

As CybTouch's range entry model, CybTouch 6 is designed specifically for conventional (torsion bar) 2-axis press brakes.

The very intuitive interface of CybTouch 6 is displayed on a bright color touch screen, which is housed in a sleek and robust panel designed for a high integration of functions; all this at a competitive price.

Thanks to its large keys, online help, simplified software and many other automatic functions that constantly guide the operator, CybTouch 6 is as simple as a positioner control.

Easy Operating

- High-contrast touchscreen, with vivid colors.
- Simple pages, clear display, large keys.
- Intuitive and user-friendly interface.
- Complete programming for efficient mass-production with multiple bends.
- Easy single bends with the EasyBend page.
- Online help and interactive warning pop-up.
- Comfortable wireless software updating and data backup using PC or Notebook.
- Large variety of languages available.

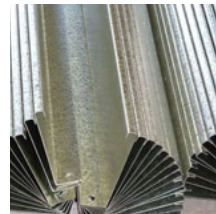

Better Bending

- Various automatic calculations of bend functions.
- Bending sequences and programs can be memorized.
- Offline PC-based CybTouch Simulator.
- Angle, pressure and crowning management.
- Easy manual movement.

Powerful

- Bend allowance calculation.
- Pressure – crowning calculation.
- Modulable tools for each part or bend.
- Punch depth calculation.
- Angle and back gauge correction.

Easy operating,
better bending and
powerful features
all characterize
CybTouch 6
